Thiago Cunha

Software Developer
Macaé, Rio de Janeiro, Brasil

Resumo

I'm a proactive and responsible front-end developer in web systems based on Wordpress. I seek a highlight to start my career as a Java developer, where is my main focus. I possess strong technical skills aligned with creativity, and I also have great interest in new learnings. I have 12 years of experience in developing successful systems interfaces and contributed to offer revenue to the companies in a highlight directive to put my knowledge into practice.

Experiência

Aimbra
Fullstack Node.js
outubro de 2016 - Present
Rio de Janeiro e Região, Brasil

Meu trabalho se resume ao desenvolvimento e engenharia de softwares para clientes no Brasil, Finlândia, Japão e Estados Unidos.

Meu trabalho se inicia desde a análise de requisitos, UML para documentação, design UX/UI, até ao desenvolvimento frontend com ReactJS até ao backend com php e principalmente nodejs.

Corujito
Desenvolvedor de front-end
novembro de 2017 - Present
Coritiba

Development of applications using HTML5, CSS and Javascript using the SASS preprocessor on top of a JSP platform, JSF, backend with Java, UX/UI Design with Adobe Illustrator Tools and Adobe XD.

Development of the new platform using Angular Technologies 5 using Microservice models in RESTful. All the architecture of the application I decided to do in a more horizontal model to maintain an abstraction of the world oriented to objects.

Sapiensia Tecnologia
Software Developer

agosto de 2018 - outubro de 2018 (3 meses)

Rio de Janeiro e Região, Brasil

I act in the development of frontend applications using Javascript in their ES-Next versions alongside the Angular framework in versions 2 and higher. Also in parallel, work in the engineering Backend application with Microsoft Technologies, using C# programming languages with Framework .Net Framework and .Net Core.

Oneplace

Senior Webdesigner
